

Marketing Data and Technology

Draw Insights from
Marketing Data

Part One: Setting Goals

Identify Key Business Objectives

Key Business Objective:

1	<i>Attract new clients, have a clear objective and design a clear marketing strategy.</i>
2	<i>Determine marketing target audience and allocate funds for effective communication.</i>
3	<i>must be evaluated in a thorough and accurate manner.</i>
4	<i>Monitor progress to stay on task, meet deadlines, and achieve objectives.</i>
5	<i>Establish the final target time for manufacturing to concentrate and complete the product on schedule.</i>

Identify Key Performance Indicators

Key Performance Indicator (KPI):

1	<i>Click-through rate : CTR measures clicks on a link compared to impressions, evaluating the relevance of clickable website elements to target audience.</i>
2	<i>Bounce rate : Bounce rate measures visitor interest and single-page sessions, revealing website design or content issues, providing insight into experiment control and variant effectiveness.</i>
3	Conversion rate: Conversion rate measures user conversion on a website, indicating the percentage of users taking desired actions, such as clicking links or signing up.
4	<i>Average order value (AOV): Average order value (AOV) measures customer spending on a website, crucial for evaluating A/B test variant effectiveness and assessing website changes' impact on spending.</i>
5	<i>Revenue: Revenue is the north star metric in A/B tests, affecting hypothesis impact and coordinating with conversion rate, AOV, and abandonment rate.</i>

Part Two: A/B Testing Proposal

A/B Testing Proposal: KPI, Variable, and Hypothesis

KPI used as the basis for an A/B Test:

- Click-through rate : CTR measures clicks on a link compared to impressions, evaluating the relevance of clickable website elements to target audience.
- Bounce rate : Bounce rate measures visitor interest and single-page sessions, revealing website design or content issues, providing insight into experiment control and variant effectiveness.
- **Conversion rate: Conversion rate measures user conversion on a website, indicating the percentage of users taking desired actions, such as clicking links or signing up.**
- Average order value (AOV): Average order value (AOV) measures customer spending on a website, crucial for evaluating A/B test variant effectiveness and assessing website changes' impact on spending.
- Revenue: Revenue is the north star metric in A/B tests, affecting hypothesis impact and coordinating with conversion rate, AOV, and abandonment rate.
- Average order value (AOV): Average order value (AOV) measures customer spending on a website, crucial for evaluating A/B test variant effectiveness and assessing website changes' impact on spending.

You are comparing several versions of one variable. For instance, if you wanted to test the forms on your website, you would design three different forms while maintaining the same variables on each page. By doing it this manner, you can always compare like with like. and if we need to choose the best to this project we will go in web forms.

Two samples will be tested, the first of which will be the original and the second of which will have simpler and alternative specifications. I'll merely publish photographs and watch to see which of the two categories attracts the consumer.

In A : I'll use the original and make no alterations to it.

In B : In this example, I'll simplify the interface and replace it with a more contemporary, user-friendly design that includes a description of the products.

Web forms Creative B will likely receive more clicks than Web Forms Creative A, in my opinion.

A/B Testing Proposal: Testing Process

Describe the steps you would take to perform the A/B test.

- Test one variable and create multiple versions to compare.
- Focus on one variable and create different versions to compete against each other.
- Determine a hypothesis for the test that suggests what you expect to happen.
- Set the time duration and budget parameters of your test and plan the experiment accordingly.
- Run the test all the way to completion.
- review the results and see if the data is statistically significant.
- Determine whether or not your testing hypothesis turned out to be accurate and adjust your marketing strategy accordingly

I will , use a data analysis tool like Google Analytics to review my data.

And i will determine the matrices in

- Sales
- Booked Calls
- Leads
- Sign Ups

Part Three: Data Exploration

Reports Snapshot

- Timeframe
- New users
- Axis values

متوسط مدة التفاعل
< 2 دقيقة

المستخدمون الجدد
772 ألف

826 ألف >

Reports Snapshot

Which month had the most new users, and which month had the fewest new users?

The most New users : 4 - 10 December

The fewest users : 20 - 23 July

Do you have any ideas why certain trends are associated with these specific months?

Due to an occasion or activity that occurred on this International Day for Human Rights and the fact that a famous person celebrates their birthday today, I anticipate a rise in sales on those days due to the current trend.

User Tech

355	150	318	Referral

User Acquisition

During the twelve month period you've selected, which channel groups had the highest and lowest engagement rates and the highest and lowest total revenue?

Highest engagement: Direct

Lowest engagement: Unassigned

Highest revenue: Direct

Lowest revenue: Paid search

What do these metrics mean, based on your experience?

These metrics show how customers engage with the products, the ordering and payment process, and which channel they use more, giving us an idea of which channel we should invest more in and advance.

Monetization

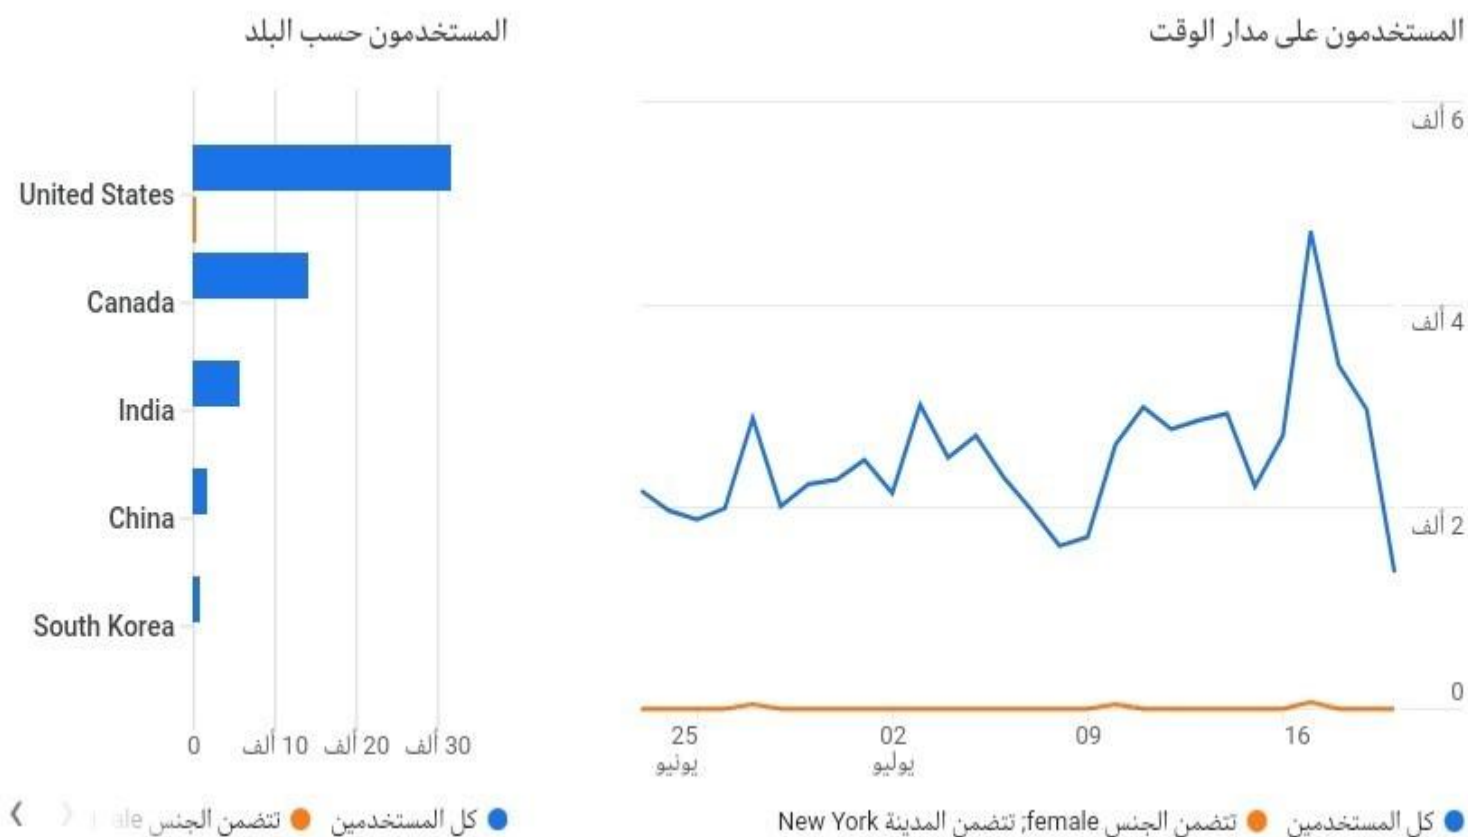

- Item names
- Number of items purchased
- Item revenue

أرباح	السلع المشتراة	السلع المضافة إلى سلة التسوق	السلع المعروضة	+	اسم العنصر

Audience Segment: Technology

Part Five: Analysis and Suggestions

Analysis and Suggestions: Business Sales Growth

2021 Solar YouTube Ads Sales Funnel Campaigns	Bid strategy	Cost	Views	Clicks	Conv v	Revenue	ROAS
Solar Leads - In-Stream RT - Conversions	Max Conv.	\$1,760.23	41,677	9,964	20	\$10,957.48	6.2
Solar Subscribers - Discovery Keywords - CPV	Manual CPV	\$4,344.11	185,217	0	7	\$20,977.68	4.8

Analysis and Suggestions: Business Sales Growth

Due to the increased growth and customer interaction solar seal's calls we will have growth about %20 for least 6 month, I anticipate that if we invest in it, we will see higher returns.

2021 Solar YouTube Ads Sales Funnel Campaigns	Bid strategy	Cost	Views	Clicks	Conv.	Revenue	ROAS
Solar Leads - In-Stream Solar Cheat Code Website	Max Conv.	\$270.11	2,002	318	0	0	0
Maximize Conv - Solar Sales Calls - Custom Intent	Max Conv.	\$920.59	3,527	655	6	0	0

Analysis and Suggestions: eCommerce

UX change: Display social proof through user-generated content, such as reviews, emails, or followers, to build brand trust and reduce doubts, improving user experience and reducing concerns about products.

Other eCommerce change or addition: Enhance product pages with customer reviews and testimonials to boost conversion rates and demonstrate authenticity as an authentic seller.

Analysis and Suggestions: Technology

1	GSMM 2021 Technology Stack	Yearly Cost	Monthly Cost
2	Quickbooks	540	50
3	Gusto	696	58
4	Typeform	996	99
5	Zapier	588	73.5
6	GoHighLevel	2976	297
7	Storyblocks	360	30
8	Screencastify	150	12.5
9	VidIQ Pro	90	7.5
10	AdZoola	1000	50

I will add two new additional technologies

- Google Search Console
- Hootsuite
